

## Quick Reflection of Experience

Jada Wright

My experience with Special Collections has been wonderful and would certainly partake in the study again given the chance! Being able to experience what the department had to offer was a delightful time, especially the tour of the basement. This semester, I worked on the Susie Van Kirk Collection which was a fully uncompromised series of all her career work documenting Humboldt county. I've uploaded several from binder #1 and all of binder #73. I think the greatest take away from this internship was the opportunity to work with rare collections and try and understand the methods and systems it takes to run it.

Shout out to the basement level too! A bit scary but the amount of cool pieces was very fun and interesting to flip through.
