## How to combine PDFs, JPEGS, etc. automatically with Photoshop

Once you have scanned a large item in pieces from multiple angles you can have them automatically combined into one final put together image

Hannah Evans, 2025

Select "Photomerge"

Select "Browse" and select the set of images you want to combine Select "Ok" The program will take a minute to start processing the photos so be patient It will automatically adjust/combine the photos, don't interfere until it shows you the final combined image Then you can crop, straighten, etc. Finally, "Save" new image
