HOUSING NEEDED FOR STUDENTS

The Humboldt State College Housing Office is seeking the assistance of the Humboldt Bay community in solving a serious housing shortage for students during the coming academic year.

Director of Housing William Kingston revealed that some 800 students' applications for on-campus housing have been denied because all residence hall space has been taken for the fall quarter. Consequently, at least that many students will be searching for housing in the area in September. Rooms, room and board, apartments and houses for rent are needed.

The Housing Office is soliciting listings from landlords and persons interested in renting rooms in their homes to students. The office will distribute cards for information on available accommodations upon request.

When completed and returned to the College, these cards will be posted near the office in easy access to students needing quarters. The cards may be obtained by telephoning the Housing Office at 826-3368.
